016 - 017 COLLECTION

ABOUT US

Our story has started in 1995, in Rize and while bringing our story into the present, our goal was to become a global brand by gaining power locally. What carried us from those days to today, what enabled us to make our dreams come true was our ethical values that we did not compromise and our approach to human as our focus point. We have approached to our employees who have embraced Zivella like its founders and to our customers who have helped us gain new experiences every once in a while with this consciousness. This awareness also made Zivella a brand that prepares and produces its own collection, exports to over 20 countries, and achieved its both short-term and long-term goals.

In this catalog, you will see our products

that reflect the value we give to our customers and consumers with "Zivella Consciousness". We aimed to design "beneficial" products that stay connected with the users by staying away from temporary trends, taking care of the social change of the urbanites and having a strong place relation. We have transformed our innovative designs into products that are able to meet all the needs of the work environment, adding soul and value to the space with each and every piece.

With the values we have we, as Zivella, will continue to grow in a structure that keeps pace with the speed of time, by managing with all its processes using the advantages of technological developments, and by constantly adopting ourselves.
