## Our Approach to Design

We design to offer new experiences in the changing work environment with our life-oriented approach. We focus on creating products that are not only functional and aesthetically pleasing but also beneficial for the body and soul. When designing, we draw inspiration from the lives of the individuals we serve.

We place the concept of reflection at the core of our design process. We develop products that reflect life, nature, culture, humanity, and colors in our designs.

In our design process, we abstract the existing life, past experiences, observations within life, accumulations and knowledge, aiming to create familiar experiences. This way, we offer reflections of life, nature, culture, humanity, and colors in our designs.

So, are you ready for a new experience with Zivella?
