## Our Approach to Design

While bringing our designs to life, we focus on several things: life itself, changing conditions, habits, the new working order, and the dreams of working individuals.

We do not compromise on minimalism and simplicity, nor do we refrain from using the energy of color in our designs.

Through the concise use of simple materials in our “good for the body and soul” designs, we ensure that our products are simple, comfortable, ergonomic and sustainable.

We bring to life designs which, when used, make you feel healthy and energetic, while also providing privacy when required and easy socializing when not.

Our designs enable spaces to breathe, resulting in users feeling calm and balanced.

So, are you ready for a new experience with Zivella?
