Overview of Hole	03
Solutions for the Product Group	08
2D Drawings	10

Inspired by the gravitational force of black holes, Hole is designed for waiting areas, incorporating modular pieces of various sizes. In addition to its main elements, the product family includes side tables and ottomans, bringing dynamism to the space. With its unique form and modular nature, it meets all the needs of a waiting area on its own.

## Hole

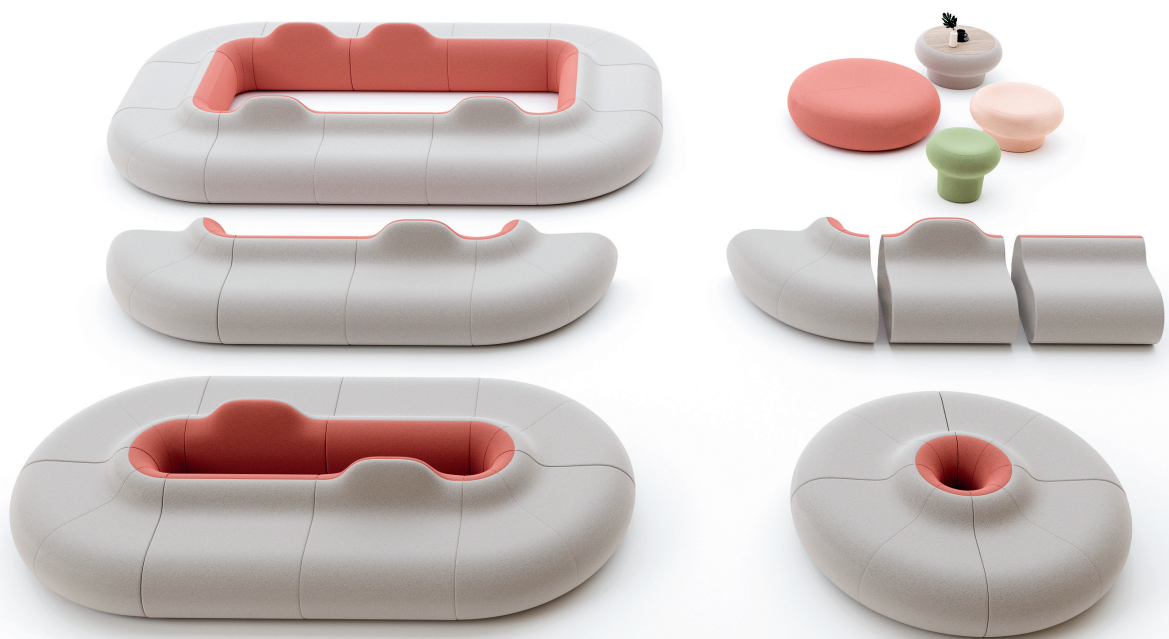

Featuring a minimal backrest and a spacious seating area, Hole offers superior comfort in waiting areas. At the same time, it boasts a stylish and modern design. With its unique form and flexible structure, it was honored with the 2023 iF Design Award.

## Hole Accessories

The Hole Product Group includes three different sizes of ottomans and tables with melamine or veneer tops, in addition to its waiting modules. Although they are part of the Hole product line, they can also be paired with other product groups.

With its design concept, Hole can serve as the focal point of a space or be shaped to fit around architectural elements like walls and columns, ensuring seamless spatial integration.

The contrast between the inner and outer surfaces with two different color options is designed to emphasize the gravitational pull theme of black holes. If desired, both sections can be chosen in the same color.
