## Product Catalogue

Designer: Adnan Serbest

 **zivella**

Mila is a product collection that reflects a design approach accessible to everyone, adhering to sustainability criteria. While maintaining an inclusive universal stance, it also aims to embody the tranquility and simplicity of minimalism.

The Mila product group is designed to create breathable, calm, and feel-good spaces.

Mila is a leader in its field when it comes to minimizing unnecessary material use, achieving simplicity in design, reducing energy consumption in the production process, and enhancing efficiency in packaging, transportation, and delivery.

## Mila Workstations

Thanks to the integration of Mila Work Group and Mila Storage Systems, you can create various areas within office spaces using only the Mila group.

The Mila Storage Group can be modularly expanded by connecting its components, while it can also be positioned with dual and quad work desks.

Mila eliminates the usual cluttered cable appearance with its integrated electrification system inside the panel.

The melamine-coated framed separator used in Mila workstations draws attention to its linear form. The line separator frame between the two panels provides cohesion.

The three variations of Mila bookcases are the same width as the table tops. In this way, unlimited combinations can be achieved in workspaces. With the option of combining different sizes and modular products in different sizes, the design can add movement to the space, create space or act as a separator.

## Mila Storage

The Mila Storage Group consists of bookshelves and credenzas. The bookshelves, including the cabinets inside, are modular. They can be added to workstations and used as separators in addition to their storage functionality.

Three cabinets are placed on each shelf of Mila bookcases. The cabinets can be attached to the bookshelves or can be used disassembled.

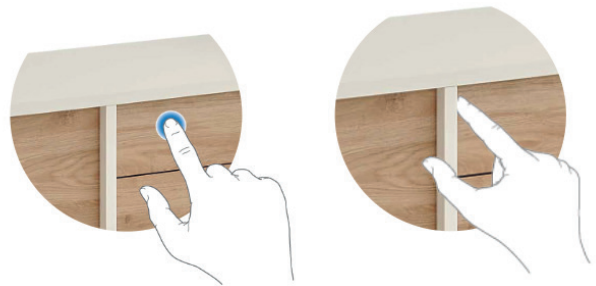

Mila etajers are produced in two different sizes, short and long, thus offering options to create working environments according to the spaces.

Telescopic rail with push-open system is used in the drawers of the dresser. Thanks to the push-open telescopic rails, handles are not used in the drawers. Longitudinal handles made of melamine material are used on the covers. It is made of 25mm material in the same color as the legs in order to match the metal legs.

## Mila Meeting Tables

Mila meeting tables combine maximum focus and aesthetics in meeting rooms with their minimal and elegant design.

Table top covers can be opened in both directions with metal sheet part solution. Socket Covers are made of the same material as the table top. Table top and legs are connected to each other with chipboard screws from metal sheets on the legs.

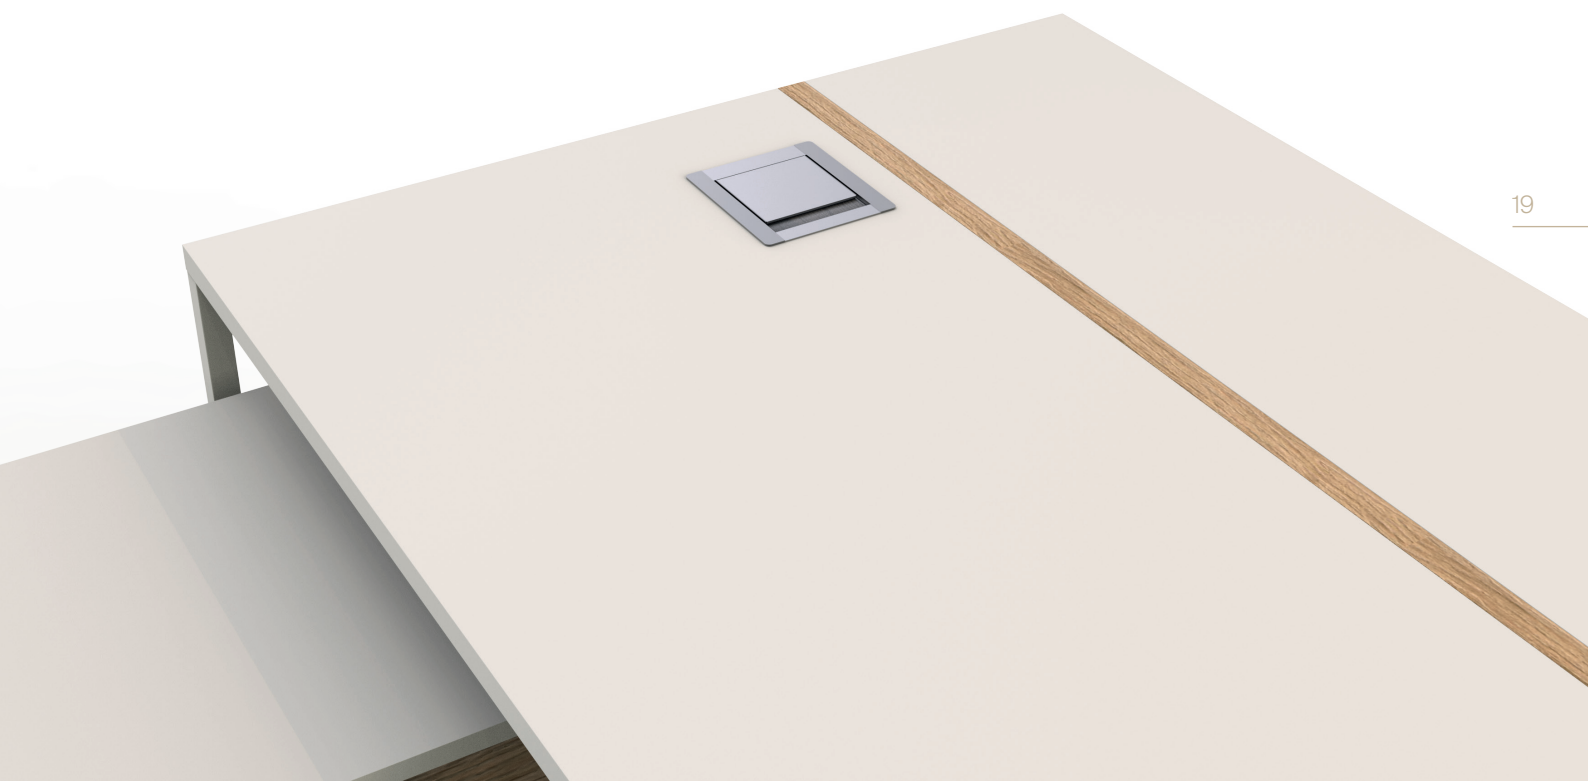

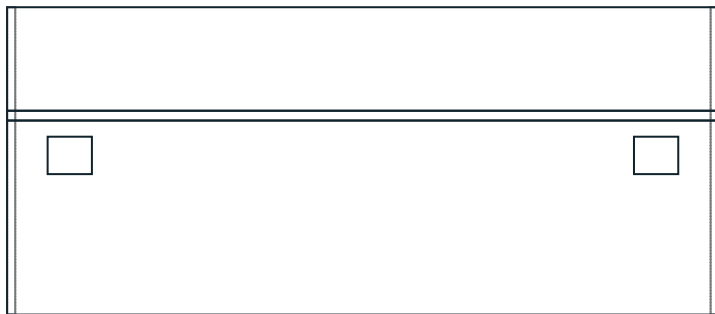

## Mila Executive Desks

The Mila executive group introduces a fresh perspective to the needs of modern executives with its diverse

A total of two socket boxes are used on the table top on the left and right side. In this way, instead of producing two different models of tables as left and right, it can be used in a single model without direction.

## Mila Individual Desks

Mila stands out as a product group that embodies sustainability with simplicity, free from excessive details, and conveys these principles to its users.

Single desks bring a fresh appearance to office workspaces, while the home office group combines minimalism with home workspaces.

Mila single tables with curtains, separators, L-table, caisson and cabinet options meet different needs in homes and offices.

Mila single tables manage to achieve the goal of sustainability with the simplicity in connection details and ease of production.

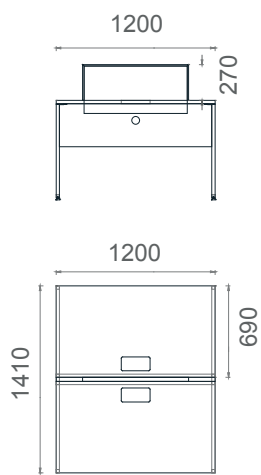

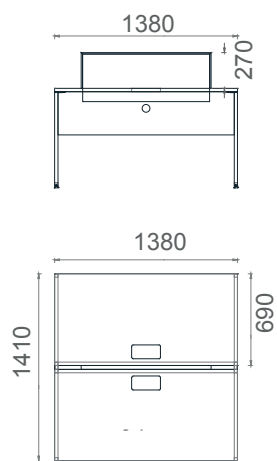

Mila L tables allow for personalization in the storage unit while creating workspaces.
