Overview of Norm	03
2D Drawings	07

Norm is a timeless product that appeals to managers of all ages, independent of changing fashion and trends, and easily adapts to other decorative elements in the space. Its simplicity in design offers a rich yet minimalistic feel.

The strong structure of metal is balanced with the warmth of wood, and the overall harmony of the linear forms in the design creates a simple composition. The combination of melamine and lacquer finishes can be customized for both upper and mid-level managers.

With a wide storage space created by the credenza and console, Norm offers a simple and effective solution with its integrated power system placed on the credenza.

Electrification

The SOLELINE power system, featuring 3 Network + 1 UPS + 1 HDMI/CAT6 + 1 USB-A/C modules, meets nearly all of the workspace's power needs.

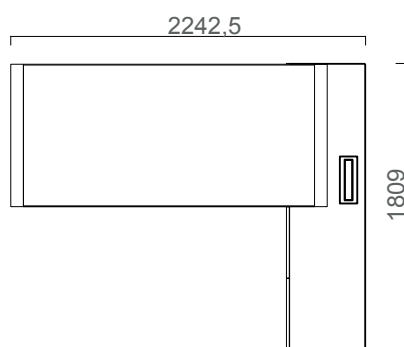

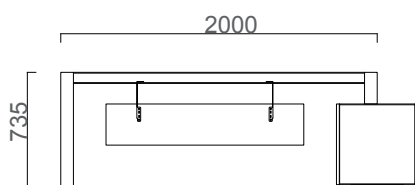

The Norm Console, which carries the same lines as the desk, breaks the mass with its elegant metal profile legs, separating itself from the floor and creating a more spacious, brighter perception of the space.
