Mio Product Line is a collection designed in line with minimalist criteria, offering functional solutions through simplicity—avoiding ornamentation and excessive material use.
With its clean and simple design, Mio creates workspaces that evoke a minimalist aesthetic. Its pure form is intended to bring calmness and spaciousness to any environment.
The Mio series is fully knock-down (KD); every component is designed for flat packing, easy storage, and reassembly. This offers benefits for maintenance and replacement while also optimizing production, inventory, and packaging processes.

One of the key features that distinguishes Mio from similar products is its completely demountable structure. This enables consistent use of shared components and offers uniform post-sales service across different customer needs—all while maintaining the same design approach and philosophy.

Mio allows for flexible workspace arrangements using storage units and workstation groups, offering adaptable configurations to meet various user requirements.

All desks can be configured with the required storage capacity using a variety of mobile pedestal and credenza modules.

Why Mio?

As a fully knock-down product—designed for flat-packing, shipping, and tool-free assembly—the Mio collection embraces a minimalistic approach while offering a wide range of sizes and model variants.

Its easy-to-pack structure ensures convenience in shipping, warehousing, and storage. Standardized aluminum injection molded legs are used across all models, simplifying mass production.

Mio Workstation

Designed with a harmonious blend of metal and wood, Mio's clean desktop and practical storage options support improved focus in the workplace.

Mio Workstation

-Credenza Support Leg

The Mio Workstation series can be combined with all pedestal and credenza modules, thanks to its compatible support legs. Units from the Mio Storage Group, such as Pedestals, Credenzas, and Long Credenzas, can be used with all desk types.

-Partition Panels

Mounted onto the tabletop using a slot-fit system. Table tops are manufactured as a single solid surface.

Mio Executive Desks

With a perfect harmony of wood and metal, Mio’s clean desktop and functional storage support improved productivity in executive workspaces.

Organization

Available in three-legged, credenza-leg, and four-legged versions, enabling a wide variety of storage unit configurations tailored to user needs.
Cable management solutions are integrated into the credenza top.

Desk Configuration

For combinations involving an Executive Desk and Credenza, modules featuring cable access covers must be used. Additional pedestals or side cabinets can be added as desired.

Cable Access Cover

Mio Single Desks

Mio offers configuration options to meet user needs through its credenza-leg and three-leg desk models, which are compatible with various pedestal or credenza storage units.The Mio Executive Desk Group easily adapts to different spaces by providing flexible storage solutions tailored to each user.

Table Detail

Single / Executive Desks

Both desk types can be used in operational areas in three-legged, four-legged, or credenza-leg models.
The key distinction of executive desks lies in the inclusion of wooden detailing beneath the tabletop and their larger dimensions.

Table Detail

Mio Home Office

Mio is entirely knock-down—each component can be disassembled, flat-packed, and stored. While expressing minimalism, it offers a wide range of sizes and models.

Organization

The top surface includes a leather-covered writing pad, ensuring ergonomic and comfortable work conditions. Desks can be produced in all color and texture options from the Zivella Melamine Finish Chart. The leather writing pad can be produced using any material from the Zivella Leather Collection.
A removable power and cable access lid is included.

Power Lid / Cable Channel

3-Leg Home Office Desk

When configuring Mio Home Office Desks with a credenza, the user may choose any pedestal or side cabinet below the desk. A wooden detailing piece—similar to executive models—is also included beneath the tabletop.

Credenza Connection Leg

Mio Meeting Extension Desk

When combining the Mio Executive Desk with Meeting Extension and a credenza, units with cable access covers should be used. Additional pedestal or side cabinet modules can be added afterward.
Designed as an alternative between the Mio Executive and Mio Single Desk models.

Table Detail

Meeting Extension + Storage

The Mio Executive Desk with Meeting Extension can be combined with pedestal or credenza modules as needed. Compared to other models, it is manufactured with a larger tabletop surface to accommodate meeting needs. This product is available exclusively in the 3-leg model.

Mio Executive Desks

Mio offers a variety of configurations using credenza-leg and three-leg desk models, with storage options like pedestals and credenzas to meet specific workspace needs. These solutions allow for effortless adaptation to any space.

Models

Mio Executive Desks are available in three-legged, credenza-leg, and four-legged models, offering a wide range of storage combinations to suit user requirements.

Executive Desk Components

Executive desks include a leather-covered writing pad and drawer modules beneath the tabletop. The writing pad is made of 1mm DKP steel sheet covered in leather. These components are not available in the single desk series.

Executive Drawer Module

Executive Storage

When combining the Mio Executive Desk with a credenza, modules with cable access covers must be used. Additional pedestal or side cabinet units can be included as needed.

Electrification

Mio Executive Desks do not feature an integrated power cover on the desktop. The electrification solution is implemented through the credenza top panel.

Credenza Cable Access Cover

Mio Storage Group

The Mio product line is entirely knock-down (KD); each component can be disassembled, flat-packed, and stored. In line with its minimalist approach, it offers a wide variety of size and model alternatives.

Storage

The Mio cabinet modules are manufactured in three variants: open, half-door, and full-door configurations.
Designed to be functional in offices, open-plan offices, and home office interiors, Mio storage cabinets embody a minimalist design philosophy.
When used in combination with pedestals and credenzas from the Mio Workstation Group, a sense of unity and simplicity is achieved in the workspace.

Storage

In terms of color design, shelves and doors are inset relative to the side panels, supporting a structure that visually frames the inner elements. Using contrasting colors between internal and external parts helps highlight the design.
Cabinet doors feature recessed handles made from plastic.

Credenzas / Pedestals

Credenza modules from the Mio Storage Group are compatible with all workstation groups.
Double, quadruple, and six-person workstation sets, as well as Credenza-Leg and 3-Leg Executive Desks, and Home Office desks, can be paired with credenza and pedestal modules for storage purposes.

Credenzas / Pedestals

Pedestal models in the Mio Storage Group can be placed side by side to create a customized credenza unit.

Credenza cabinets are used exclusively as under-desk modules. Additional storage components such as pedestals or side cabinets can be selected afterward.

Workstation Credenza / Pedestal

Mio Workstation credenzas are compatible with all workstation setups.
There are two lengths and two storage configurations available for use with 70 cm and 80 cm deep worktops in double, quadruple, and six-person workstation setups.

Pedestal

In the Workstation Group, all pedestal and side cabinet models can be used.
In credenza-leg workstation models, storage is integrated under the tabletop or used as standalone storage units.

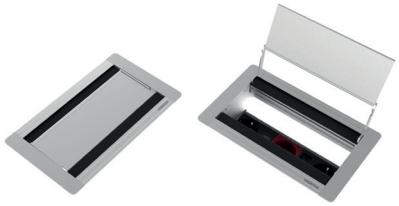
Mio Meeting Tables

Mio meeting tables support a holistic design approach in office environments with their minimalist form, lightweight yet durable metal legs, and variety of shapes and dimensions.

Meeting Table Components

Meeting tables are equipped with the Twoway Mini Power Outlet Cover. Central legs and cable covers are made from 1 mm and 3 mm thick CNC-bent DKP steel sheets. Cable channels made from 0.8 mm DKP steel can be mounted in a knock-down manner onto metal crossbars.

The TWOWAY Desk Power Outlet includes:
3 x Standard Sockets + 3 x UPS Sockets + 1 x Cat6 + 1 x Cat3 + 1 x USB + HDMI.



Dual-Access Power Cover

Central Leg Cable Cover Plate

The electrification solution in meeting tables is implemented through cable channels located beneath the power outlets and enclosed by the cable cover plate inside the central leg. These covers are installed in a knock-down manner.

Central Leg Cable Cover Plate

Cable Channel

Cable channels are CNC-bent, knock-down components.
They help conceal and organize power cables, guiding them toward the cable cover plate inside the central leg.

Cable Channel

Meeting Table Models

Mio Meeting Tables are available in round, square, and elliptical shapes in a wide range of sizes.
In smaller models, the Twoway Mini Power Outlet Box is used.
